To Whom It May Concern,

I am pleased to write this letter of recommendation for my student, Natnael Sisay Bedada who is applying for admission into the **Bachelor of Science in Computer Science** program. As his teacher in Subject, Programming & algorithms, ,Computer Networking & security, System Development, Compiler & complexity, intelligent systems, CA&OS service at **Assosa University**, I have had the privilege of closely observing Natnael's academic performance, discipline, and enthusiasm for technology-related fields.

Natnael has shown a deep interest and aptitude in areas such as computer systems, data management, and digital tools. He has consistently performed well in class, demonstrating not only solid theoretical understanding but also practical problem-solving skills. His curiosity and eagerness to learn are outstanding qualities that I believe will help him thrive in higher education.

In class, he often took initiative in discussions, helped peers, and approached tasks with a positive and responsible attitude. Natnael is not only academically capable but also respectful, dependable, and committed to personal and academic growth. I am confident that Natnael will make valuable contributions to your program and community. I fully support his application and recommend him without reservation. If you have any questions or need further details, please feel free to contact me at Fikeeshetu@gmail.com

Sincerely,

Fekadu Eshetu
