

NATNAEL SISAY

Full-Stack Developer

Addis Ababa, Ethiopia | Open to Remote Opportunities | nsisay49@gmail.com
Portfolio: [nasi.work](#) | GitHub: github.com/Natnsis | LinkedIn: [linkedin.com/in/natnael-sisay-orcadev](https://www.linkedin.com/in/natnael-sisay-orcadev)

PROFESSIONAL SUMMARY

Full-stack developer with professional experience shipping production web applications end-to-end, from **React/Next.js/TypeScript** frontends to **Go and Node.js/Express** backends. Comfortable owning a feature from database schema to deployed UI: REST API design, authentication, state management, and responsive interface work. Has independently designed and shipped 15+ projects spanning full-stack web apps, mobile apps (React Native, Flutter), and developer tooling, in addition to team-based production work. Strong interest in understanding systems deeply rather than relying on abstractions, and in picking up unfamiliar stacks quickly.

TECHNICAL SKILLS

- Languages:** TypeScript, JavaScript, Go, Python, SQL
- Frontend:** React, Next.js, Svelte/SvelteKit, Tailwind CSS, shadcn/ui, Zustand, TanStack Query, React Hook Form, Zod, React Router, Vite
- Backend:** Go (Gin, GORM), Node.js/Express, REST APIs, JWT Auth, bcrypt, WebSockets, Prisma, PostgreSQL, MySQL, Supabase
- Mobile:** React Native, Expo, Flutter
- Tools/Infra:** Git/GitHub, Docker, Docker Compose, Azure DevOps, Linux, Vercel, Cloudinary, AWS (basic)

EXPERIENCE

Pitron Tech Solutions — Full-Stack Developer 2026 - Present

Addis Ababa, Ethiopia

- Develop and maintain production web applications end-to-end, building UI in React/TypeScript/Tailwind CSS and taking on backend and DevOps tasks in Go, Docker, and Docker Compose.
- Build the **Noble Lemmat Fleet Management System**, an administrative platform covering customers, vehicles, drivers, shipments, and live operations.
- Integrate frontend applications with REST APIs, manage server state with TanStack Query, and manage client-side state with Zustand.
- Build reusable, responsive UI components using shadcn/ui and Tailwind CSS; implement routing, forms, validation, and error handling.
- Collaborate with designers and backend developers to translate requirements and designs into functional interfaces, using Git and Azure DevOps in a Linux-based workflow.

Commercial Bank of Ethiopia — IT Intern

Ethiopia

- Diagnosed and resolved desktop, OS, and network-related issues across a banking branch environment, including PCs, printers, ATMs, and networking equipment.
- Verified company website functionality across branch network environments and provided day-to-day technical support to staff.

SELECTED PROJECTS

SnipStack Go · Next.js · MCP

- Built a snippet and prompt manager for developers and AI coding agents, including a personal style profile that agents can read to match a user's coding conventions.

DevFolio (FolioHub) Go · SvelteKit · PostgreSQL

- Built a social platform where developers post portfolio projects and receive ratings on UI, UX, and code quality.

Gebeya — Full-Stack E-Commerce Platform Next.js · Supabase · PostgreSQL · Stripe

- Built a full-stack e-commerce application with separate customer and admin functionality, role-based access, Stripe payments, and Zod/React Hook Form validation; deployed on Vercel.

Mereb Landing Next.js · Strapi CMS · TypeScript

- Built the marketing and API documentation site for a payment gateway product, backed by a headless Strapi CMS, including a bilingual SACCO loan-repayment flow that proxies a real backend.

PlantPal Flutter · Go · Gemini API

- Built a plant-care companion for Android that identifies houseplants from a photo, generates an AI care schedule via the Gemini API, and tracks garden health over time.

EDUCATION

Assosa University — B.Sc. in Computer Science 2025

CGPA: 3.8 / 4.0

- Team Lead for a six-member final-year project team; led development and coordination through implementation and delivery, including adapting the project's payment integration from Chapa to Stripe close to the deadline.
